The following graphic depicts the methodology for Cambria's Value and Momentum ETF (VAMO). The VAMO ETF utilizes a quantitative approach to actively manage a portfolio of domestic equities. The VAMO ETF also applies a hedging strategy to reduce exposure to the US stock market based on quantitative measures of broad valuation and trend.

**To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expense before investing. Read the prospectus carefully before investing or sending money.**

The Cambria ETFs are distributed by SEI Investments Distribution Company, 1 Freedom Valley Drive, Oaks, PA 19456, which is not affiliated with Cambria Investment Management, LP, the Investment Adviser for the Fund.

ETFs are subject to commission costs each time a "buy" or "sell" is executed. Depending on the amount of trading activity, the low costs of ETFs may be outweighed by commissions and related trading costs.

Shares are bought and sold at market price (closing price) not net asset value (NAV) are not individually redeemed from the Fund. Market price return are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined), and do not represent the return you would receive if you traded at other times. Buying and selling shares will result in brokerage commissions. Brokerage commissions will reduce returns.

There is no guarantee the fund will achieve its investing goal. Investing involves risk, including the possible loss of principal. Investments in smaller companies typically exhibit higher volatility. The fund is actively managed using proprietary strategies and processes. There can be no guarantee that these strategies and processes will produce the intended results and no guarantee that the fund will achieve its investment objective. With short sales, you risk paying more for a security than you received from its sale. Short sale losses are potentially unlimited and expenses involved with the shorting strategy may negatively impact the performance of the fund.

The Funds are actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will produce the intended results and no guarantee that a Fund will achieve its investment objective. This could result in the Fund's underperformance compared to other funds with similar investment objectives.

There is no guarantee dividends will be paid. Diversification may not protect against market loss.

There are special risks associated with margin investing. As with stocks, you may be called upon to deposit additional cash or securities if your account equity declines.
