

Cambria Foreign Shareholder Yield ETF (FYLD)

Summary Prospectus

September 1, 2024

Listed on CBOE BZX Exchange, Inc.

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information, shareholder reports, and other information about the Fund online at www.cambriafunds.com/fyld. You can also get this information at no cost by calling 855-ETF-INFO (383-4636) or by sending an e-mail request to info@cambriafunds.com. The Fund's Prospectus and Statement of Additional Information, dated September 1, 2024, as each may be further amended or supplemented, are incorporated by reference into this Summary Prospectus.

FUND SUMMARY

Cambria Foreign Shareholder Yield ETF

INVESTMENT OBJECTIVE

The Fund seeks income and capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

| | |
|---|-------|
| Management Fee*: | 0.59% |
| Distribution and/or Service (12b-1) Fees: | 0.00% |
| Other Expenses: | 0.00% |
| Total Annual Fund Operating Expenses: | 0.59% |

* Pursuant to the Fund's investment advisory agreement, the Fund pays the Adviser (defined below) a unitary management fee. The Adviser, in turn, bears all of the Fund's expenses, except for the management fee, payments under the Fund's 12b-1 plan, brokerage expenses, acquired fund fees and expenses, taxes, interest (including borrowing costs and dividend expenses on securities sold short), litigation expense and other extraordinary expenses (including litigation to which Cambria ETF Trust or the Fund may be a party and indemnification of the Trustees and officers with respect thereto).

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. The example does not reflect any brokerage commissions that you may pay on purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

| One Year: | Three Years: | Five Years: | Ten Years: |
|-----------|--------------|-------------|------------|
| \$60 | \$189 | \$329 | \$738 |

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. For the fiscal year ended April 30, 2024, the Fund's portfolio turnover rate was 44% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is actively managed and seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its total assets in equity securities, including common stock and depositary receipts, issued by publicly listed companies in developed foreign markets excluding the US (“developed ex-US”), that provide high “shareholder yield.” The Fund’s investment adviser, Cambria Investment Management, L.P. (“Cambria” or the “Adviser”), defines “shareholder yield” as the totality of returns realized by an investor from a company’s cash payments for dividends, buybacks and debt paydowns. The Adviser considers an issuer to be in a developed ex-US market if it is domiciled or principally traded in any of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Italy, Ireland, Israel, Japan, Jersey, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. The Adviser will update the list of developed foreign markets annually.

For the purposes of this strategy, Cambria calculates a company’s shareholder yield by considering the following characteristics: (i) dividend payments to shareholders, (ii) return of capital in the form of share buybacks (*i.e.*, a company’s repurchase of its own shares from the marketplace, which, in turn, reduces the number of outstanding shares for continuing shareholders or generates proceeds for existing shareholders), and (iii) paydown of a company’s debt (*i.e.*, reducing a company’s outstanding debt). Cambria believes that, while any one of these measures of a company’s cash flows, in isolation, is inadequate to determine the attractiveness of its equity securities, considered together these measures have the potential to result in the construction of a portfolio of companies with higher potential for income and capital appreciation.

Utilizing its own quantitative model, Cambria selects the top 20% of stocks in the initial universe of developed ex-US, publicly listed companies based on their shareholder yield, as measured by dividend payments and net share buybacks. Cambria’s quantitative algorithm then factors in the remaining stocks’ debt paydowns and applies a number of value metrics to create a composite, including metrics such as, but not limited to, price-to-book (P/B) ratio, price-to-sales (P/S) ratio, price-to-earnings (P/E) ratio, price-to-free cash-flow (P/FCF or P/CF) ratio, and enterprise multiple (EV/EBITDA). Cambria then selects the top 100 stocks for inclusion in the Fund’s portfolio that exhibit, in the aggregate, the best combination of shareholder yield characteristics and value metrics. Although Cambria seeks to weight these stocks equally in the Fund’s portfolio, security weights may fluctuate in response to market conditions and investment opportunities.

Cambria screens the Fund’s portfolio to limit its exposure to any single country outside the United States to 30% of Fund assets. Although the Fund generally expects to invest in companies with larger market capitalizations, the Fund may invest in small- and mid-capitalization companies. As of August 1, 2024, the Fund had significant investment exposure to companies in the energy, financials, materials, and industrials sectors, as well as companies in Japan, Canada, and Europe; however, the Fund’s sector and geographic exposure may change from time to time.

The Fund may sell a security when Cambria believes that the security is overvalued or better investment opportunities are available, to invest in cash and cash equivalents, or to meet redemptions. Cambria expects to adjust the Fund’s holdings periodically to meet the investment criteria and target allocations (*e.g.*, security weights and country-specific limits) established by the Fund’s quantitative algorithm.

PRINCIPAL RISKS

An investment in the Fund involves risk. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. The Fund’s principal risks are presented in alphabetical order to facilitate investors’ ability to identify particular risks and compare them with the risks of other funds. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its objective. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. For more information about the risks of investing in the Fund, see the sections titled “Additional Information About the Funds’ Risks” and “Additional Non-Principal Risk Information.”

Buyback Risk. When a company repurchases its shares from the marketplace through share buybacks, investors may perceive this action to be a reflection of management's belief that company shares are undervalued, but there is no guarantee that the price of a company's stock will increase after the company announces a buyback. Accordingly, share buybacks may not be an accurate predictor of a company's value or future share performance.

Currency Strategies Risk. Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may affect the U.S. Dollar value of the Fund's investments.

Cyber Security Risk. The Fund, and its service providers, may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, including Cambria, the sub-adviser, the custodian, and the transfer agent, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Depository Receipts Risk. The risks of investments in depository receipts are substantially similar to the risks of investing directly in foreign securities. In addition, depository receipts may not track the price of or may be less liquid than their underlying foreign securities, and the value of depository receipts may change materially at times when the U.S. markets are not open for trading.

Dividend Paying Security Risk. Securities that pay high dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high dividends.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments due to factors affecting a specific issuer, market or securities markets generally.

ETF Structure Risk. The Fund is an ETF, and, as a result of an ETF's structure, it is exposed to the following risks:

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Premium-Discount Risk. Shares may trade above (premium) or below (discount) their NAV. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange. This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings, and this could lead to differences between the market price of the Shares and the underlying value of those Shares.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market may pay brokerage commissions or other charges, which may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur a bid/ask spread, which varies over time for Shares based on trading volume and market liquidity and is generally higher if Shares have little trading volume and market liquidity. Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. In addition, trading in Shares on the Exchange may be halted.

Foreign Investment Risk. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including risks due to: (i) differences in information available about foreign issuers; (ii) differences in investor protection standards in other jurisdictions; (iii) capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; (iv) political, diplomatic and economic risks; (v) regulatory risks; and (vi) foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions. In addition, the Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

Canada Risk. Changes to the U.S. economy may significantly affect the Canadian economy because the U.S. is Canada's largest trading partner and foreign investor. The economy of Canada is also heavily dependent on the demand for natural resources and agricultural products. Accordingly, a change in the supply and demand of these resources, both in Canada and worldwide, can have a significant effect on Canadian market performance. Conditions that weaken demand for its products worldwide could have a negative impact on the Canadian economy as a whole.

Europe Risk. The Economic and Monetary Union of the European Union ("EU") requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners. In addition, the United Kingdom has formally exited the EU ("Brexit"). Although it remains unclear what the potential consequences of Brexit may be, the economies of Europe and the United Kingdom, as well as the broader global economy, could be significantly impacted by Brexit, which may result in lower economic growth and increased volatility and illiquidity across global markets.

Japan Risk. The economy of Japan is heavily dependent on international trade, government support, and consistent government policy supporting its export market. Slowdowns in the economies of key trading partners such as the United States, China and countries in Southeast Asia could have a negative impact on the Japanese economy as a whole. Trade tariffs and other protectionist measures could also have an adverse impact on the Japanese export market.

International Closed-Market Trading Risk. Because the Fund's investments may be traded in markets that are closed when the Exchange is open, there are likely to be deviations between the current pricing of an underlying investment and stale investment pricing (*i.e.*, the last quote from its closed foreign market), resulting in premiums or discounts to NAV that may be greater than those experienced by other ETFs.

Investment Risk. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares, they could be worth less than what you paid for them.

Large Capitalization Company Risk. The Fund's investments in large capitalization companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

Management Risk. The Fund is actively managed using a model-based approach, and the Adviser selects Fund investments on a periodic basis using a proprietary quantitative algorithm developed by the Adviser for the Fund. There can be no guarantee that these strategies and processes, or the Adviser's quantitative model, will be effective or successful investment management techniques or that the Adviser's judgments about the attractiveness, value and potential appreciation of particular Fund investments will be correct even if the Adviser's overall investment strategies and processes are otherwise effective. Further, there is no guarantee that the Fund will achieve its investment objective.

Market Events Risk. Turbulence in the financial markets, reduced liquidity in the equity markets, and/or the advent of certain economic or political events, including global events such as war, acts of terrorism or a public health crisis, may negatively affect issuers, which could have an adverse effect on certain Fund holdings. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve and/or other government actors, such as the recent increases in interest rates, could cause increased volatility in financial markets and higher levels of Fund redemptions, which could have a negative impact on certain Fund holdings.

Quantitative Security Selection Risk. Cambria uses quantitative techniques to generate investment decisions and select stocks, and the Fund may not perform as intended if it relies on erroneous or outdated data from one or more third parties. Errors in data used in the quantitative model may occur from time to time and may not be identified and/or corrected before having an adverse impact on the Fund and its shareholders.

Sector Risk. To the extent that the Fund invests a significant portion of its assets in a particular sector, the Fund may be susceptible to loss due to adverse occurrences affecting that sector.

Energy Sector Risk. The energy sector includes, for example, oil, gas, and consumable fuel companies. Energy companies can be substantially impacted by, among other things, the volatility of oil prices, worldwide supply and demand, worldwide economic growth, and political instability in oil or gas producing regions such as the Middle East and Eastern Europe.

Financials Sector Risk. Performance of companies in the Financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

Industrials Sector Risk. Issuers in the industrials sector are affected by supply and demand, both for their specific product or service and for industrial sector products in general. The products of such issuers may face obsolescence due to rapid technological developments and frequent new product introduction. Government regulations, world events, economic conditions and exchange rates affect the performance of companies in the industrial sector. Issuers in the industrials sector may be adversely affected by liability for environmental damage, product liability claims and exchange rates. The industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced by unpredictable factors.

Materials Sector Risk. Issuers in the materials sector may be adversely affected by commodity price volatility, exchange rates, import controls, increased competition, depletion of resources, technical progress, labor relations and government regulations, among other factors. Issuers in the materials sector may be liable for environmental damage and product liability claims. Production of materials may exceed demand as a result of market imbalances or economic downturns, leading to poor investment returns.

Small and Medium Capitalization Company Risk. Investing in securities of small and medium capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies, and they may be more sensitive to market conditions.

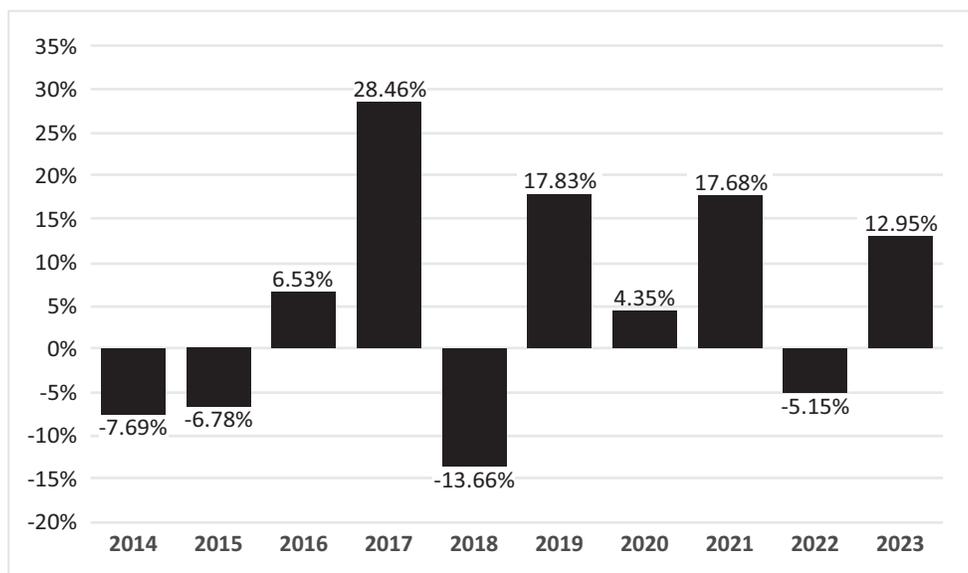

Value Investment Risk. The Fund considers certain value metrics when selecting stocks for inclusion in its portfolio and, as a result, the Fund may underperform when the market favors stocks with growth characteristics or a non-value investment approach. Value investments are subject to the risk that their intrinsic value may never be realized by the market.

PERFORMANCE

The following bar chart and table indicate the risks of investing in the Fund by showing how the Fund's average annual total returns compare with those of the MSCI EAFE + Canada Index, which is a relevant broad-based securities market index that provides a measure of the performance of the overall international ex-US equity market. Performance is also shown for an additional index, the MSCI EAFE Index, which represents the overall international equity market, excluding the United States and Canada. All returns include the reinvestment of dividends and distributions. As always, please note that the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available at www.cambriafunds.com.

The Fund's investment objective and strategies changed effective June 1, 2020. Prior to that date, Fund performance reflects the investment objective of the Fund when it sought investment results that corresponded (before fees and expenses) generally to the price and yield performance of the Cambria Foreign Shareholder Yield Index.

Total Annual Returns for Calendar Year Ended December 31

As of June 30, 2024, the Fund's year-to-date total return was 5.49%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

Best: 22.68%, for the quarter ended December 31, 2020.

Worst: -31.93%, for the quarter ended March 31, 2020.

Average Annual Total Returns for the period ending December 31, 2023

| Cambria Foreign Shareholder Yield ETF | 1 Year | 5 Year | 10 Year |
|--|---------------|---------------|----------------|
| Return Before Taxes..... | 12.95% | 9.16% | 4.65% |
| Return After Taxes on Distributions..... | 11.35% | 7.89% | 3.85% |
| Return After Taxes on Distributions and Sale of Fund Shares..... | 8.79% | 7.10% | 3.77% |
| MSCI EAFE + Canada Index (Reflects no deduction for fees, expenses or taxes)*..... | 18.60% | 9.02% | 4.85% |
| MSCI EAFE Index (Reflects no deduction for fees, expenses or taxes)*..... | 18.85% | 8.69% | 4.78% |

* In connection with newly adopted SEC regulations applicable to the Fund the MSCI EAFE + Canada Index is the Fund's new broad-based securities market index. Performance information is also shown for the MSCI EAFE Index, the Fund's previous broad-based securities market index.

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-deferred arrangements, such as 401(k) plans or individual retirement plans.

INVESTMENT ADVISERS

Cambria Investment Management, L.P. serves as the investment adviser to the Fund. Tidal Investments LLC serves as the sub-adviser (the "Sub-Adviser") to the Fund.

PORTFOLIO MANAGERS

Mebane T. Faber, Chief Investment Officer of Cambria, and Jonathan Keetz, Chief Operating Officer of Cambria, are the portfolio managers for the Fund. Mr. Faber has managed the Fund since its inception in December 2013, and Mr. Keetz has managed the Fund since September 1, 2024.

PURCHASE AND SALE OF FUND SHARES

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a "premium") or less than NAV (at a "discount"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the "bid/ask spread"). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website at <http://www.cambriafunds.com/fyld>.

TAX INFORMATION

Distributions you receive from the Fund are generally taxable to you as ordinary income for federal income tax purposes, except that distributions will be taxed to you at long-term capital gain rates to the extent reported by the Fund as “capital gain dividends” or “qualified dividend income,” and may also be subject to state or local taxes. Fund distributions may not be taxable to you if you are investing through a tax-advantaged retirement plan account or are a tax-exempt investor, although you may be taxed on withdrawals from your tax-advantaged account.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
