

## Cambria Global Value ETF (GVAL)

### Summary Prospectus

September 1, 2020

Listed on CBOE BZX Exchange, Inc.

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information, shareholder reports, and other information about the Fund online at [www.cambriafunds.com/gval](http://www.cambriafunds.com/gval). You can also get this information at no cost by calling 855-ETF-INFO (383-4636) or by sending an e-mail request to [info@cambriafunds.com](mailto:info@cambriafunds.com). The Fund's Prospectus and Statement of Additional Information, both dated September 1, 2020, as each may be amended or supplemented, are incorporated by reference into this Summary Prospectus.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from your financial intermediary (such as a broker-dealer or bank). Instead, the reports will be available on the Fund's website ([www.cambriafunds.com](http://www.cambriafunds.com)), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. Please contact your financial intermediary to request to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account.

## FUND SUMMARY

### Cambria Global Value ETF

#### INVESTMENT OBJECTIVE

The Fund seeks income and capital appreciation.

#### FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

#### ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

Management Fee: .....	0.59%
Distribution and/or Service (12b-1) fees: .....	0.00%
Other Expenses: .....	0.06%
Custodial Expenses: .....	0.06%
Total Annual Fund Operating Expenses: .....	0.65%

#### EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that the operating expenses remain the same. The example does not reflect any brokerage commissions that you may pay on purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year:	Three Years:	Five Years:	Ten Years:
\$66	\$208	\$362	\$810

#### PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund’s performance. For the fiscal year ended April 30, 2020, the Fund’s portfolio turnover rate was 25% of the average value of its portfolio.

#### PRINCIPAL INVESTMENT STRATEGIES

The Fund is actively managed and seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its total assets in equity securities, including common stock and depositary receipts, issued by publicly listed companies in developed and emerging markets that exhibit strong value characteristics. The Fund’s investment adviser, Cambria Investment Management, L.P. (“Cambria” or the “Adviser”), uses its own proprietary rules-based quantitative algorithm to select the Fund’s holdings.

Utilizing its own quantitative model, Cambria identifies countries with undervalued securities markets, according to various value metrics, including the cyclically adjusted price-to-earnings ratio, commonly known as the “CAPE Shiller P/E ratio.” The CAPE Shiller P/E ratio for a country’s equity market (typically represented by a broadly diversified index) is derived by

dividing the current market value of a country's primary stock market index (e.g., S&P 500) by the average of ten years of earnings of index constituent companies (moving average), adjusted for inflation. Cambria's algorithm then identifies equities that (i) are domiciled or principally traded in one of the countries with undervalued securities markets and (ii) exhibit strong value characteristics. The algorithm applies a number of value metrics to individual equity securities, including, but not limited to, price-to-sales (P/S) ratio, price-to-earnings (P/E) ratio, and enterprise multiple (EV/EBITDA). Securities in the Fund may be denominated in either the U.S. dollar or other currencies. Although Cambria seeks to weight these stocks equally in the Fund's portfolio, security weights may fluctuate in response to market conditions and investment opportunities.

Cambria screens the Fund's portfolio to limit its exposure to any single country outside the United States to 20% of Fund assets. Although the Fund generally expects to invest in companies with larger market capitalizations, the Fund may invest in small- and mid-capitalization companies. At least 40% of the Fund's holdings are expected to be composed of securities of issuers domiciled or principally traded in at least three countries (including the United States). As of July 31, 2020, the Fund had significant exposure to companies in the financial services, utilities and materials sectors as well as companies in Europe.

The Fund may sell a security when Cambria believes that the security is overvalued or better investment opportunities are available, to invest in cash and cash equivalents, or to meet redemptions. Cambria expects to adjust the Fund's holdings periodically to meet the investment criteria and target allocations (e.g., security weights and country-specific limits) established by the Fund's quantitative algorithm. The Fund may also invest in U.S.-listed exchange traded funds ("ETFs") to gain exposure to the equity markets and issuers of developed and emerging market countries.

## PRINCIPAL RISKS

An investment in the Fund involves risk. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The Fund's principal risks are presented in alphabetical order to facilitate investors' ability to identify particular risks and compare them with the risks of other funds. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return, and/or ability to meet its objective. There is no assurance that the Fund will achieve its investment objective. An investor may lose money by investing in the Fund. For more information about the risks of investing in the Fund, see the sections titled "Additional Information About the Funds' Risks" and "Additional Non-Principal Risk Information."

**Cash Redemption Risk.** The Fund's investment strategy will require it to effect redemptions by Authorized Participants, in whole or in part, for the cash value of large blocks of Shares called Creation Units. As a result, the Fund may pay out higher annual capital gain distributions and be less tax-efficient than if the in-kind redemption process was used exclusively. In addition, cash redemptions may incur higher brokerage costs than in-kind redemptions and these added costs may be borne by the Fund and negatively impact Fund performance.

**Currency Strategies Risk.** Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may affect the U.S. Dollar value of the Fund's investments.

**Cyber Security Risk.** The Fund may be susceptible to operational and information security risks resulting from a breach in the Fund's cyber security, including cyber-attacks against the Fund, third-party service providers, market makers, Authorized Participants, or issuers of securities in which the Fund invests. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information.

**Depository Receipts Risk.** The risks of investments in depository receipts are substantially similar to the risks of investing directly in foreign securities. In addition, depository receipts may not track the price of or may be less liquid than their underlying foreign securities, and the value of depository receipts may change materially at times when the U.S. markets are not open for trading.

**Dividend Paying Security Risk.** Securities that pay high dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high dividends. Also, changes in the dividend policies of companies owned by the Fund and the capital resources available for these companies' dividend payments may adversely affect the Fund.

**Emerging Markets Risk.** Emerging market investments are subject to the same risks as foreign investments and to additional risks due to greater political and economic uncertainties as well as a relative lack of information about issuers in such markets. Securities of emerging market issuers may become illiquid and be subject to volatility and high transaction costs.

**Equity Investing Risk.** The values of equity securities could decline generally or could underperform other investments due to factors affecting a specific issuer, market or securities markets generally.

**Exchange-Traded Funds and Investment Companies Risk.** The risks of investing in securities of ETFs and investment companies typically reflect the risks of the types of instruments in which the underlying ETF or investment company invests. In addition, with such investments, the Fund bears its proportionate share of the fees and expenses of the underlying entity. As a result, the Fund's operating expenses may be higher and performance may be lower.

**Foreign Investment Risk.** Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including risks due to: (i) differences in information available about foreign issuers; (ii) differences in investor protection standards in other jurisdictions; (iii) capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; (iv) political, diplomatic and economic risks; (v) regulatory risks; and (vi) foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions. In addition, the Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

**Europe Risk.** The Economic and Monetary Union of the European Union ("EU") requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners. In addition, the United Kingdom has formally exited the EU ("Brexit"). Although it remains unclear what the potential consequences of Brexit may be, the economies of Europe and the United Kingdom, as well as the broader global economy, could be significantly impacted by Brexit, which may result in lower economic growth and increased volatility and illiquidity across global markets.

**International Closed-Market Trading Risk.** Because the Fund's investments may be traded in markets that are closed when the Exchange is open, there are likely to be deviations between the current pricing of an underlying investment and stale investment pricing (*i.e.*, the last quote from its closed foreign market), resulting in premiums or discounts to NAV that may be greater than those experienced by other ETFs.

**Investment Risk.** An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares they could be worth less than what you paid for them.

**Large Capitalization Company Risk.** The Fund's investments in large capitalization companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

**Liquidity Risk.** Liquidity risk exists when a particular investment is difficult to purchase or sell. A significant, rapid rise in interest rates may result in a period of volatility and increased redemptions if Fund securities become illiquid and are forced to sell the illiquid securities at disadvantageous times or prices. This could have a negative effect on the Fund's ability to achieve its investment objective and may result in losses to Fund shareholders.

**Management Risk.** The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.

**Market Events Risk.** Turbulence in the financial markets, reduced liquidity in the equity markets, and/or the advent of certain economic or political events, including global events such as war, acts of terrorism or a public health crisis, may negatively affect issuers, which could have an adverse effect on the Fund. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve and/or other government actors, such as increasing interest rates, could cause increased volatility in financial markets and higher levels of Fund redemptions, which could have a negative impact on the Fund.

*Recent Events.* The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a global pandemic and major disruption to economies and markets around the world, including the United States. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Liquidity for many instruments has been greatly reduced for periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced particularly large losses. These circumstances may continue for an extended period of time, and may continue to affect adversely the value and liquidity of the Fund's investments.

**Premium-Discount Risk.** Shares may trade above (premium) or below (discount) their NAV. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange. This risk is heightened in times of market volatility or periods of steep market declines.

**Quantitative Security Selection Risk.** Cambria uses quantitative techniques to generate investment decisions and select stocks, and the Fund may not perform as intended if it relies on erroneous or outdated data from one or more third parties. Errors in data used in the quantitative model may occur from time to time and may not be identified and/or corrected before having an adverse impact on the Fund and its shareholders.

**Secondary Market Trading Risk.** Investors buying or selling Shares in the secondary market may pay brokerage commissions, which may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur a bid/ask spread, which varies over time for Shares based on trading volume and market liquidity and is generally higher if Shares have little trading volume and market liquidity. Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. In addition, trading in Shares on the Exchange may be halted.

**Sector Risk.** To the extent that the Fund invests a significant portion of its assets in a particular economic sector, the Fund may be susceptible to loss due to adverse occurrences affecting that sector.

**Financial Services Sector Risk.** Performance of companies in the financial services sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

**Materials Sector Risk.** Issuers in the materials sector may be adversely affected by commodity price volatility, exchange rates, import controls, increased competition, depletion of resources, technical progress, labor relations and government regulations, among other factors. Issuers in the materials sector may be liable for environmental damage and product liability claims. Production of materials may exceed demand as a result of market imbalances or economic downturns, leading to poor investment returns.

**Utilities Sector Risk.** Utilities include companies such as electric, gas and water firms and renewable energy companies. Companies in the utilities sector may be adversely impacted by many factors, including, among others, supply and demand, operating costs, financing costs, rate caps or rate changes, government regulation and environmental factors. Deregulation of utilities may also subject these companies to increased competition and reduce their profitability.

**Small and Medium Capitalization Company Risk.** Investing in securities of small and medium capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies, and they may be more sensitive to market conditions.

**Value Investment Risk.** Value investments are subject to the risk that their intrinsic value may never be realized by the market. Value investments tend to underperform when the market favors stocks with growth characteristics or a non-value investment approach.

**PERFORMANCE**

The following bar chart and table indicate the risks of investing in the Fund by showing how the Fund’s average annual total returns compare with those of a relevant index that provides a broad measure of market performance. All returns include the reinvestment of dividends and distributions. As always, please note that the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available at [www.cambriafunds.com](http://www.cambriafunds.com).

The Fund’s investment objective and strategies changed effective June 29, 2020. Prior to that date, Fund performance reflects the investment objective of the Fund when it sought investment results that corresponded (before fees and expenses) generally to the price and yield performance of the Cambria Global Value Index.

**Total Annual Returns for Calendar Year Ended December 31**

As of June 30, 2020, the Fund’s year-to-date total return was -25.63%.

**Best and Worst Quarter Returns (for the period reflected in the bar chart above)**

Best: 9.01%, for the quarter ended 9/30/16  
 Worst: -9.03%, for the quarter ended 9/30/15

**Average Annual Total Returns for the period ending December 31, 2019**

	1 Year	5 Years	Since Inception (March 11, 2014)
<b>Cambria Global Value ETF</b>			
Return Before Taxes.....	16.42%	6.87%	2.08%
Return After Taxes on Distributions.....	16.36%	7.13%	2.28%
Return After Taxes on Distributions and Sale of Fund Shares.....	10.99%	6.28%	2.38%
MSCI ACWI Index (Reflects no deduction for fees, expenses or taxes) .....	27.30%	9.00%	8.46%

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-deferred arrangements, such as 401(k) plans or individual retirement plans.

## **INVESTMENT ADVISER**

Cambria Investment Management, L.P. serves as the investment adviser of the Fund.

## **PORTFOLIO MANAGER**

Mebane T. Faber is the portfolio manager for the Fund and has managed the Fund since its inception in March 2014.

## **PURCHASE AND SALE OF FUND SHARES**

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a "premium") or less than NAV (at a "discount"). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the "bid/ask spread"). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website at [www.cambriafunds.com](http://www.cambriafunds.com).

## **TAX INFORMATION**

Distributions you receive from the Fund are generally taxable to you as ordinary income for federal income tax purposes, except that distributions will be taxed to you at long-term capital gain rates to the extent reported by the Fund as "capital gain dividends" or "qualified dividend income," and may also be subject to state or local taxes. Fund distributions may not be taxable to you if you are investing through a tax-advantaged retirement plan account or are a tax-exempt investor, although you may be taxed on withdrawals from your tax-advantaged account.

## **PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
