

Cambria ETF Trust

All Funds

**Supplement dated September 28, 2023
to each currently effective Prospectus and Statement of Additional Information (“SAI”),
as may be amended or supplemented**

The following information supplements and should be read in conjunction with each Prospectus and SAI.

Changes to the Trust’s Officers

Effective as of September 13, 2023, the Board of Trustees (the “Board”) of Cambria ETF Trust (the “Trust”) has appointed Aaron Perkovich to serve as Treasurer and Principal Financial Officer of the Trust. Accordingly, the description of the Trust’s prior Principal Financial Officer, as set forth in the Officers table under the “Management of the Funds” section of the SAI, is deleted in its entirety and replaced by the following:

Name and Year of Birth	Position(s) Held with Trust, Term of Office, and Length of Time Served	Principal Occupation During Past 5 Years
Aaron Perkovich YOB: 1973	Treasurer and Principal Financial Officer since Sept. 2023; no set term	Head of Fund Administration (since 2023), Fund Administration Manager (2022 – 2023), Tidal ETF Services LLC; Assistant Director – Investments, Mason Street Advisors, LLC (2021 – 2022); Vice President, U.S. Bancorp Fund Services, LLC (2006 – 2021).

Changes to the Funds’ Service Providers

In addition, the Board has appointed (i) Tidal ETF Services LLC to serve as administrator to the Funds, (ii) U.S. Bancorp Fund Services, LLC to serve as sub-administrator, fund accountant, and transfer agent to the Funds; and (iii) U.S. Bank National Association to serve as custodian to the Funds. Accordingly, the descriptions of the Trust’s prior services providers under the descriptions of “Administrator” and “Custodian and Transfer Agent”, as set forth in the “Investment Management and Other Services” section of the SAI, are deleted in their entirety and replaced by the following:

Administrator

Tidal ETF Services LLC (“Tidal” or the “Administrator”), a Tidal Financial Group company and an affiliate of Toroso, located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, serves as the administrator to each Fund. Pursuant to a Fund Administration Servicing Agreement between the Trust and Tidal, Tidal provides the Trust with, or arranges for, administrative and management services (other than investment advisory services) to be provided to the Trust and the Board, such as, but not limited to, clerical and general back office services; bookkeeping, internal accounting and secretarial services; the calculation of NAV; and the

preparation and filing of certain reports, updates to registration statements, and other materials required to be filed or furnished by a Fund under federal and state securities laws. In addition, Tidal provides an officer or employee of Tidal to serve as the Trust's principal financial officer, coordinates the payment of certain Fund-related expenses, and manages the Trust's relationships with certain of its service providers. As compensation for the services it provides, Tidal receives a fee based on each Fund's average daily net assets. Tidal also is entitled to certain out-of-pocket expenses for the services mentioned above.

Sub-Administrator, Fund Accountant and Transfer Agent

U.S. Bancorp Fund Services, LLC, d/b/a U.S. Bank Global Fund Services ("Global Fund Services" or the "Sub-Administrator" or the "Transfer Agent"), located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Funds' sub-administrator and fund accountant as well as transfer agent to each Fund's assets. Pursuant to a Partial Fund Administration Servicing Agreement and a Fund Accounting Servicing Agreement between Global Fund Services and the Trust, Global Fund Services provides the Trust with administrative and management services (other than investment advisory services) and accounting services, including portfolio accounting services, tax accounting services and furnishing financial reports. In this capacity, Global Fund Services does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Shares. Pursuant to a Transfer Agent Servicing Agreement, Global Fund Services has agreed to: (1) issue and redeem shares of each Fund in Creation Units, (2) make dividend and other distributions to shareholders of each Fund, (3) maintain shareholder accounts, and (4) make periodic reports to the Funds. As compensation for each of these services, Global Fund Services receives a fee based on the Funds' average daily net assets, subject to a minimum annual fee. Global Fund Services also is entitled to certain out-of-pocket expenses for the services mentioned above, including pricing expenses.

Custodian

U.S. Bank National Association ("U.S. Bank" or the "Custodian"), located at 1555 N. Rivercenter Drive, Milwaukee, Wisconsin 53212, serves as custodian to each Fund's assets. U.S. Bank is the parent company of Global Fund Services. As custodian, U.S. Bank has agreed to: (1) make receipts and disbursements of money on behalf of a Fund, (2) collect and receive all income and other payments and distributions on account of a Fund's portfolio investments, and (3) make periodic reports to a Fund concerning the Fund's operations. U.S. Bank does not exercise any supervisory function over the purchase and sale of securities. As compensation for these services, the Custodian receives certain out-of-pocket costs, transaction fees and asset-based fees which are accrued daily and paid monthly by Cambria from its fees, except that the Cambria Emerging Shareholder Yield ETF and Cambria Global Value ETF bears their own Custodial expenses.

In addition, the Funds' former custodian will no longer serve as the Funds' securities lending agent. As a result, the Funds' securities lending program will cease operations until such time as the Trust enters into a new securities lending agency agreement on behalf of the Funds.

Further, each reference to a former service provider under the "Other Service Providers" section set forth in each Prospectus and SAI is deleted in its entirety and replaced with a reference to the service providers noted above.

Cambria Global Value ETF (GVAL)

Summary Prospectus

September 1, 2023

Listed on CBOE BZX Exchange, Inc.

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information, shareholder reports, and other information about the Fund online at www.cambriafunds.com/gval. You can also get this information at no cost by calling 855-ETF-INFO (383-4636) or by sending an e-mail request to info@cambriafunds.com. The Fund's Prospectus and Statement of Additional Information, both dated September 1, 2023, as each may be amended or supplemented, are incorporated by reference into this Summary Prospectus.

FUND SUMMARY

Cambria Global Value ETF

INVESTMENT OBJECTIVE

The Fund seeks income and capital appreciation.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

ANNUAL FUND OPERATING EXPENSES (EXPENSES THAT YOU PAY EACH YEAR AS A PERCENTAGE OF THE VALUE OF YOUR INVESTMENT)

Management Fee:	0.59%
Distribution and/or Service (12b-1) Fees:	0.00%
Acquired Fund Fees and Expenses*:	0.01%
Other Expenses:	0.08%
Custodial Expenses:	0.08%
Total Annual Fund Operating Expenses*:	0.68%

* Total Annual Fund Operating Expenses may not correlate to the expense ratios in the Fund's financial highlights because the financial highlights reflect only the Fund's operating expenses and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

EXAMPLE

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that the operating expenses remain the same. The example does not reflect any brokerage commissions that you may pay on purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year:	Three Years:	Five Years:	Ten Years:
\$69	\$218	\$379	\$846

PORTFOLIO TURNOVER

The Fund may pay transaction costs, including commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the example, affect the Fund's performance. For the fiscal year ended April 30, 2023, the Fund's portfolio turnover rate was 94% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is actively managed and seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its total assets in equity securities, including common stock and depositary receipts, issued by publicly listed companies in developed and emerging markets that exhibit strong value characteristics. The Fund's investment adviser, Cambria Investment Management, L.P. ("Cambria" or the "Adviser"), uses its own proprietary rules-based quantitative algorithm to select the Fund's holdings.

Utilizing its own quantitative model, Cambria identifies countries with undervalued securities markets, according to various value metrics, including the cyclically adjusted price-to-earnings ratio, commonly known as the "CAPE Shiller P/E ratio." The CAPE Shiller P/E ratio for a country's equity market (typically represented by a broadly diversified index) is derived by dividing the current market value of a country's primary stock market index (e.g., S&P 500) by the average of ten years of earnings of index constituent companies (moving average), adjusted for inflation. Cambria's algorithm then identifies equities that (i) are domiciled or principally traded in one of the countries with undervalued securities markets and (ii) exhibit strong value characteristics. The algorithm applies a number of value metrics to individual equity securities, including, but not limited to, price-to-sales (P/S) ratio, price-to-earnings (P/E) ratio, and enterprise multiple (EV/EBITDA). Securities in the Fund may be denominated in either the U.S. dollar or other currencies. Although Cambria seeks to weight these stocks equally in the Fund's portfolio, security weights may fluctuate in response to market conditions and investment opportunities.

Cambria screens the Fund's portfolio to limit its exposure to any single country outside the United States to 20% of Fund assets. Although the Fund generally expects to invest in companies with larger market capitalizations, the Fund may invest in small- and mid-capitalization companies. At least 40% of the Fund's holdings are expected to be composed of securities of issuers domiciled or principally traded in at least three countries (including the United States). As of August 1, 2023, the Fund had significant investment exposure to companies in the financial services and utilities sectors, as well as companies in the Asia-Pacific region, Europe, and Latin America; however, the Fund's sector and geographic exposure may change from time to time.

The Fund may sell a security when Cambria believes that the security is overvalued or better investment opportunities are available, to invest in cash and cash equivalents, or to meet redemptions. Cambria expects to adjust the Fund's holdings periodically to meet the investment criteria and target allocations (e.g., security weights and country-specific limits) established by the Fund's quantitative algorithm. The Fund may also invest in U.S.-listed exchange traded funds ("ETFs") to gain exposure to the equity markets and issuers of developed and emerging market countries.

PRINCIPAL RISKS

An investment in the Fund involves risk. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. The Fund's principal risks are presented in alphabetical order to facilitate investors' ability to identify particular risks and compare them with the risks of other funds. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return, and/or ability to meet its objective. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. For more information about the risks of investing in the Fund, see the sections titled "Additional Information About the Funds' Risks" and "Additional Non-Principal Risk Information."

Cash Redemption Risk. The Fund's investment strategy will require it to effect redemptions by Authorized Participants, in whole or in part, for the cash value of large blocks of Shares called Creation Units. As a result, the Fund may pay out higher annual capital gain distributions and be less tax-efficient than if the in-kind redemption process was used exclusively. In addition, cash redemptions may incur higher brokerage costs than in-kind redemptions and these added costs may be borne by the Fund and negatively impact Fund performance.

Currency Strategies Risk. Currency exchange rates may fluctuate significantly over short periods of time and can be unpredictably affected by political developments or government intervention. Changes in currency exchange rates may affect the U.S. Dollar value of the Fund's investments.

Cyber Security Risk. The Fund, and its service providers, may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, including Cambria, the advisor, the custodian, and the transfer agent, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Depository Receipts Risk. The risks of investments in depository receipts are substantially similar to the risks of investing directly in foreign securities. In addition, depository receipts may not track the price of or may be less liquid than their underlying foreign securities, and the value of depository receipts may change materially at times when the U.S. markets are not open for trading.

Dividend Paying Security Risk. Securities that pay high dividends as a group can fall out of favor with the market, causing these companies to underperform companies that do not pay high dividends. Also, changes in the dividend policies of companies owned by the Fund and the capital resources available for these companies' dividend payments may adversely affect the Fund.

Emerging Markets Risk. Emerging market investments are subject to the same risks as foreign investments and to additional risks due to greater political and economic uncertainties as well as a relative lack of information about issuers in such markets. For example, emerging markets may be subject to, among other risks, greater market volatility; lower trading volume and liquidity; greater social, political and economic uncertainty; governmental controls on foreign investments and limitations on repatriation of invested capital; lower disclosure, corporate governance, auditing and financial reporting standards; fewer protections of property rights; fewer investor rights and limited legal, contractual or practical remedies available to investors against emerging market companies; restrictions on the transfer of securities or currency; and settlement and trading practices that differ from U.S. markets and markets of more developed countries.

Equity Investing Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments due to factors affecting a specific issuer, market or securities markets generally.

Exchange-Traded Funds and Investment Companies Risk. The risks of investing in securities of ETFs and investment companies typically reflect the risks of the types of instruments in which the underlying ETF or investment company invests. In addition, with such investments, the Fund bears its proportionate share of the fees and expenses of the underlying entity. As a result, the Fund's operating expenses may be higher and performance may be lower.

Foreign Investment Risk. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including risks due to: (i) differences in information available about foreign issuers; (ii) differences in investor protection standards in other jurisdictions; (iii) capital controls risks, including the risk of a foreign jurisdiction imposing restrictions on the ability to repatriate or transfer currency or other assets; (iv) political, diplomatic and economic risks; (v) regulatory risks; and (vi) foreign market and trading risks, including the costs of trading and risks of settlement in foreign jurisdictions. In addition, the Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

Asia-Pacific Risk. Investments in securities of issuers in Asia-Pacific countries involve risks that are specific to the Asia-Pacific region, including certain legal, regulatory, political and economic risks. Certain Asia-Pacific countries have experienced expropriation and/or nationalization of assets, confiscatory taxation, political instability, armed conflict and social instability as a result of religious, ethnic, socio-economic and/or political unrest. Some economies in this region are dependent on a range of commodities, and are strongly affected by international commodity prices and particularly vulnerable to price changes for these products.

Europe Risk. The Economic and Monetary Union of the European Union (“EU”) requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners. In addition, the United Kingdom has formally exited the EU (“Brexit”). Although it remains unclear what the potential consequences of Brexit may be, the economies of Europe and the United Kingdom, as well as the broader global economy, could be significantly impacted by Brexit, which may result in lower economic growth and increased volatility and illiquidity across global markets.

Latin America Risk. Investments in securities of issuers in Latin American countries involve risks that are specific to the Latin American region, including social, political, and economic conditions within this region and may be more volatile than the performance of funds that invest in more developed countries and regions or funds that focus their investments in more than one region. The Fund’s performance may be particularly sensitive to social, political and economic conditions in those countries in Latin America in which the Fund’s investments are concentrated.

International Closed-Market Trading Risk. Because the Fund’s investments may be traded in markets that are closed when the Exchange is open, there are likely to be deviations between the current pricing of an underlying investment and stale investment pricing (*i.e.*, the last quote from its closed foreign market), resulting in premiums or discounts to NAV that may be greater than those experienced by other ETFs.

Investment Risk. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your Shares, they could be worth less than what you paid for them.

Large Capitalization Company Risk. The Fund’s investments in large capitalization companies may underperform other segments of the market because they may be less responsive to competitive challenges and opportunities and unable to attain high growth rates during periods of economic expansion.

Liquidity Risk. Liquidity risk exists when a particular investment is difficult to purchase or sell. A significant, rapid rise in interest rates may result in a period of volatility and increased redemptions if Fund securities become illiquid and are forced to sell the illiquid securities at disadvantageous times or prices. This could have a negative effect on the Fund’s ability to achieve its investment objective and may result in losses to Fund shareholders.

Management Risk. The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.

Market Events Risk. Turbulence in the financial markets, reduced liquidity in the equity markets, and/or the advent of certain economic or political events, including global events such as war, acts of terrorism or a public health crisis, may negatively affect issuers, which could have an adverse effect on certain Fund holdings. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve and/or other government actors, such as the recent increases in interest rates, could cause increased volatility in financial markets and higher levels of Fund redemptions, which could have a negative impact on certain Fund holdings.

Recent Events. The COVID-19 pandemic, Russia’s invasion of Ukraine, and higher inflation have resulted in extreme volatility in the financial markets, economic downturns around the world, severe losses to some sectors of the economy and individual issuers, and reduced liquidity of certain instruments. These events have caused significant disruptions to business operations, including business closures; strained healthcare systems; disruptions to supply chains and employee availability; large fluctuations in consumer demand; large expansion of government deficits and debt as a result of government actions to mitigate the effects of such events; and widespread uncertainty regarding the long-term effects of such events.

Premium-Discount Risk. Shares may trade above (premium) or below (discount) their NAV. The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the Exchange. This risk is heightened in times of market volatility or periods of steep market declines.

Quantitative Security Selection Risk. Cambria uses quantitative techniques to generate investment decisions and select stocks, and the Fund may not perform as intended if it relies on erroneous or outdated data from one or more third parties. Errors in data used in the quantitative model may occur from time to time and may not be identified and/or corrected before having an adverse impact on the Fund and its shareholders.

Secondary Market Trading Risk. Investors buying or selling Shares in the secondary market may pay brokerage commissions, which may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur a bid/ask spread, which varies over time for Shares based on trading volume and market liquidity and is generally higher if Shares have little trading volume and market liquidity. Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. In addition, trading in Shares on the Exchange may be halted.

Sector Risk. To the extent that the Fund invests a significant portion of its assets in a particular economic sector, the Fund may be susceptible to loss due to adverse occurrences affecting that sector.

Financial Services Sector Risk. Performance of companies in the financial services sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

Utilities Sector Risk. Utilities include companies such as electric, gas and water firms and renewable energy companies. Companies in the utilities sector may be adversely impacted by many factors, including, among others, supply and demand, operating costs, financing costs, rate caps or rate changes, government regulation and environmental factors. Deregulation of utilities may also subject these companies to increased competition and reduce their profitability.

Small and Medium Capitalization Company Risk. Investing in securities of small and medium capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies, and they may be more sensitive to market conditions.

Value Investment Risk. The Fund considers certain value metrics when selecting stocks for inclusion in its portfolio and, as a result, the Fund may underperform when the market favors stocks with growth characteristics or a non-value investment approach. Value investments are subject to the risk that their intrinsic value may never be realized by the market.

PERFORMANCE

The following bar chart and table indicate the risks of investing in the Fund by showing how the Fund's average annual total returns compare with those of a relevant index that provides a broad measure of market performance. All returns include the reinvestment of dividends and distributions. As always, please note that the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available at www.cambriafunds.com.

The Fund's investment objective and strategies changed effective June 29, 2020. Prior to that date, Fund performance reflects the investment objective of the Fund when it sought investment results that corresponded (before fees and expenses) generally to the price and yield performance of the Cambria Global Value Index.

Total Annual Returns for Calendar Year Ended December 31

As of June 30, 2023, the Fund's year-to-date total return was 4.72%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

Best: 24.79%, for the quarter ended 12/31/2020

Worst: -34.33%, for the quarter ended 3/31/2020

Average Annual Total Returns for the period ending December 31, 2022

	1 Year	5 Years	Since Inception (3/11/14)
Cambria Global Value ETF			
Return Before Taxes.....	-8.40%	-1.27%	0.55%
Return After Taxes on Distributions.....	-10.04%	-1.53%	0.31%
Return After Taxes on Distributions and Sale of Fund Shares.....	-4.74%	-0.42%	0.86%
MSCI ACWI Index (Reflects no deduction for fees, expenses or taxes).....	-17.96%	5.75%	7.09%

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-deferred arrangements, such as 401(k) plans or individual retirement plans.

INVESTMENT ADVISERS

Cambria Investment Management, L.P. serves as the investment adviser to the Fund. Toroso Investments, LLC serves as the sub-adviser to the Fund.

PORTFOLIO MANAGER

Mebane T. Faber is the portfolio manager for the Fund and has managed the Fund since its inception in March 2014.

PURCHASE AND SALE OF FUND SHARES

Individual Shares are listed on a national securities exchange and may only be purchased and sold in the secondary market through a broker-dealer at a market price. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a “premium”) or less than NAV (at a “discount”). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying and selling Shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at www.cambriafunds.com.

TAX INFORMATION

Distributions you receive from the Fund are generally taxable to you as ordinary income for federal income tax purposes, except that distributions will be taxed to you at long-term capital gain rates to the extent reported by the Fund as “capital gain dividends” or “qualified dividend income,” and may also be subject to state or local taxes. Fund distributions may not be taxable to you if you are investing through a tax-advantaged retirement plan account or are a tax-exempt investor, although you may be taxed on withdrawals from your tax-advantaged account.

PURCHASES THROUGH BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
