

CAMBRIA GLOBAL VALUE ETF

GVAL

Cambria Global Value ETF

Why a Global Value Strategy?

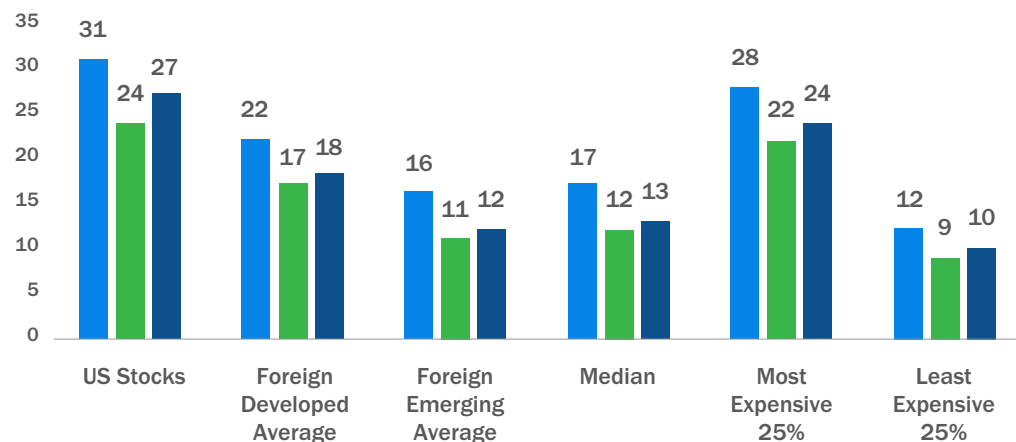

Avoid Markets with Expensive Valuations

With a substantial gap between the most and least expensive stock markets around the world, value investors may want to consider the entire world as their investable opportunity set.

By expanding the opportunity set, this not only helps to seek exposure to attractively priced markets around the world, but also helps avoid markets with the most expensive valuations.

Global Valuations (CAPE Ratios)

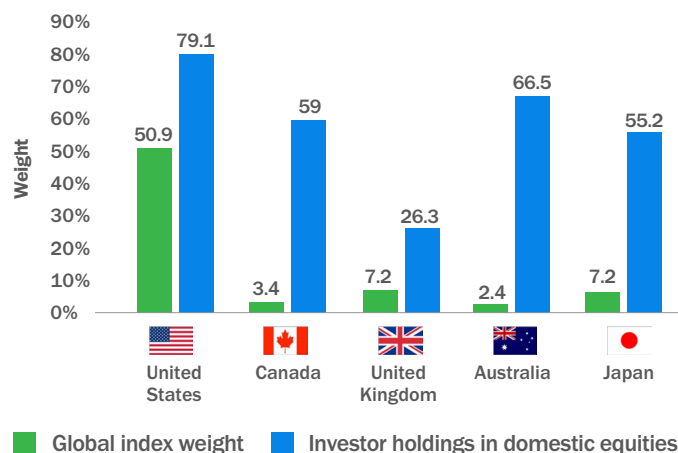

■ 12/31/2019 ■ 3/31/2020 ■ 6/30/2020

SOURCE: All CAPE ratios are MSCI IMI Indexes via Ned Davis Research, as of 6/30/2020. All are market cap weighted total stock market indices. Average are simple averages of the underlying CAPE ratios in each category

Global Diversification

Equity Market Home Bias by Country

SOURCE: Vanguard¹ as of 6/30/20

A global value strategy has potential benefits beyond pure value exposure. The home bias phenomenon is prevalent around the world, and we feel it exposes investors to unnecessary concentration.

By seeking global exposure, investors can reduce the single market risk and concentration that comes with home bias. By expanding investments globally, investors can take advantage of the benefits of diversification, reduce single security and single market risk, hold a wider variety of assets, and potentially experience less volatility as a result.

Why GVAL?

Global All-Cap, Equal Weight Approach

GVAL has an investable universe of 45 developed and emerging market countries to invest in. However, GVAL will only invest in the top quartile of the least expensive markets from that investable universe.

From there GVAL will take an equal weighted approach to those countries in the top quartile. In addition, GVAL will only invest in companies with a market capitalization of \$200 million or greater.

Country Weights

as of June 30, 2020

Systematic Process

Research shows that the Cyclically Adjusted Price to Earnings Ratio (Shiller CAPE), a measure popularized by American economist, Robert Shiller, is a very powerful predictor of future returns. Cambria believes that systematically investing in value stocks globally, based on measures of long-term stock valuation metrics similar to that of the Shiller CAPE ratio may provide better returns over the long run.

Cambria systematically targets the most attractively priced countries based on measures of long-term valuation metrics, and within that universe of stocks in-hand, selects the 10 most undervalued stocks within each country based on traditional valuation metrics.

This process is repeated annually.

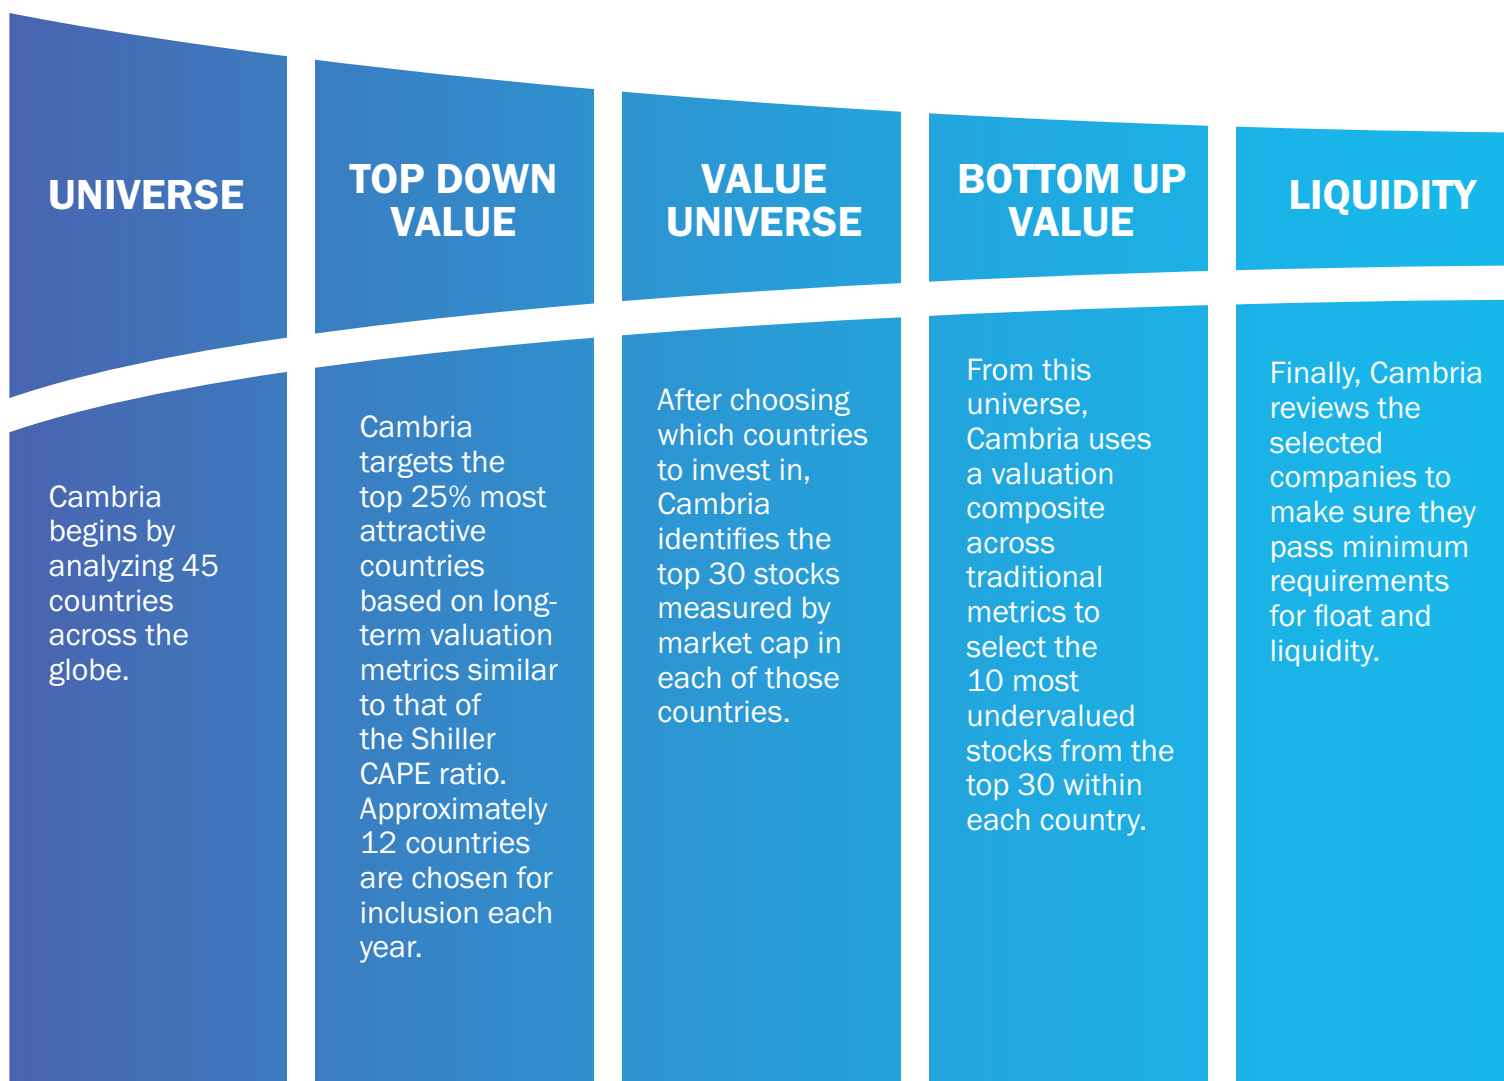

Deep Value Exposure

GVAL offers pure value exposure, trading at a discount to its category across a number of valuation metrics.

Valuation Metrics	GVAL	Category
Price/Earnings	6.24	10.29
Price/Book	0.75	0.96
Price/Sales	0.54	0.56
Price/Cash Flow	3.72	5.44
Price/Free Cash Flow	11.18	11.85
30-day SEC Yield	4.28%	6.50%

Definitions:

The CAPE ratio is the cyclically adjusted price/earnings ratio is the price of a security or equity index divided by the average inflation-adjusted earnings over past 10-years.

The price/earnings ratio (P/E Ratio) is the ratio of a company's stock price to the company's per share earnings. The price/book ratio (P/B Ratio) is the ratio of a company's stock price to the company's book value. The price/sales ratio (P/S Ratio) is the ratio of a company's stock price to the company's revenue. The price/free cash flow ratio (P/FCF Ratio) is the ratio of a company's stock price to the company's per share free cash flow. The enterprise value/earnings before interest, taxes, depreciation and amortization ratio (EV/EBITDA Ratio) is the ratio of a company's enterprise value to the company's earnings before interest, taxes, depreciation, and amortization

30-day SEC Yield is based on the most recent 30-day period and reflects the investment income earned after deducting a fund's expenses for the period.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expense before investing. This and other information can be found in the Fund's full and summary prospectus which may be obtained by calling 855-383-4636 (ETF INFO) or visiting our website at www.cambriafunds.com. Read the prospectus carefully before investing or sending money.

The Cambria ETFs are distributed by ALPS Distributors Inc., 1290 Broadway, Suite 1000, Denver, CO 80203, which is not affiliated with Cambria Investment Management, LP, the Investment Adviser for the Fund.

Past performance is not indicative of future results

Shares are bought and sold at market price (closing price) not net asset value (NAV) are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined), and do not represent the return you would receive if you traded at other times. Buying and selling shares will result in brokerage commissions. Brokerage commissions will reduce returns.

There is no guarantee that the Fund will achieve its investment goal. Investing involves risk, including the possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. In emerging markets, all these risks are heightened, and lower trading volumes may occur. Investments in smaller companies typically exhibit higher volatility.

There is no guarantee dividends will be paid. Diversification may not protect against market loss.

There are special risks associated with margin investing. As with stocks, you may be called upon to deposit additional cash or securities if your account equity declines.

The MSCI ACWI Index is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world and is maintained by Morgan Stanley Capital International. It is comprised of stocks from both developed and emerging markets.
