

Strategy Overview

Free cash flow has long been emphasized by investors as a key predictor of a company's strength. Companies that pay cash dividends, one indication of strong free cash flow, have historically outperformed the broader market. Focusing strictly on dividend payments, however, misses two key indicators of strong free cash flow: net share repurchases and net debt paydown. The manager believes that a focus on all three factors - dividend payments, net share repurchases and net debt paydown, a trio collectively known as shareholder yield - produces a portfolio of companies that offer strong free cash flow characteristics. The Cambria Large Cap Shareholder Yield ETF employs a quantitative algorithm to select approximately 50 companies with a market cap greater than \$10 billion and the best combined rank of dividend payments and net stock buybacks, which are the key components of shareholder yield. The ETF also screens for value and quality factors, including low financial leverage.

Cambria Investment Management, LP, based in Los Angeles, California, is a SEC registered investment management firm employing a disciplined multi-asset, global quantitative research process. Cambria provides investment management services through a number of portfolio strategies to high net worth individuals and institutions through exchange traded funds, separately managed accounts and private funds. Cambria is also the investment manager of the Cambria Global Value ETF (BATS: GVAL), the Cambria Foreign Shareholder Yield ETF (BATS: FYLD), the Cambria Global Momentum ETF (BATS: GMOM), the Cambria Global Asset Allocation ETF (BATS: GAA), the Cambria Value and Momentum ETF (BATS: VAMO), the Cambria Global Tail Risk ETF (BATS: FAIL), the Cambria Emerging Shareholder Yield ETF (BATS: EYLD), the Cambria Tail Risk ETF (BATS: TAIL), the Cambria Trinity ETF (BATS: TRTY), the Cambria Cannabis ETF (BATS: TOKE), the Cambria Global Real Estate ETF (BATS: BLDG), the Cambria Micro and Small Cap Shareholder Yield ETF (BATS: MYLD), the Cambria Tactical Yield ETF (BATS: TYLD), and the Cambria Large Cap Shareholder Yield ETF (LYLD). Cambria believes that any single style or approach that relies on subjective methods can be inconsistent over time, may bias the investment process, and potentially hinder performance. Global diversification through asset allocation, coupled with prudent risk management, is the foundation of Cambria's investment philosophy.

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expense before investing. This and other information can be found in the Fund's full and summary prospectus which may be obtained by calling 855-383-4636 (ETF INFO) or visiting our website at www.cambriafunds.com. Read the prospectus carefully before investing or sending money.

The Cambria ETFs are distributed by ALPS Distributors, Inc., 1290 Broadway, Suite 1000, Denver, CO 80203, which is not affiliated with Cambria Investment Management, LP, the Investment Adviser for the Fund.

This fund is new and has a limited operating history.

ETFs are subject to commission costs each time a "buy" or "sell" is executed. Depending on the amount of trading activity, the low costs of ETFs may be outweighed by commissions and related trading costs.

Shares are bought and sold at market price (closing price) not net asset value (NAV) are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined), and do not represent the return you would receive if you traded at other times. Buying and selling shares will result in brokerage commissions. Brokerage commissions will reduce returns.

There is no guarantee that the Fund will achieve its investment goal. Investing involves risk, including the possible loss of principal. High yielding stocks are often speculative, high risk investments. The underlying holdings of the fund may be leveraged, which will expose the holdings to higher volatility and may accelerate the impact of any losses. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies and the Fund's performance. Investments in smaller companies typically exhibit higher volatility. Narrowly focused funds typically exhibit higher volatility.

The Fund is managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will produce the intended results and no guarantee that the Fund will achieve its investment objective. This could result in the Fund's underperformance compared to other funds with similar investment objectives.

There is no guarantee dividends will be paid. Diversification may not protect against market loss.

The S&P 500 Index is an index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe.

*When evaluating the Morningstar category average valuation metrics (Price/Earnings, Price/Book, Price/Sales, Price/Cash Flow, Price/Free Cash Flow), because these metrics are redundant for each fund share class, we use Morningstar's option of "User Defined Primary Class Only" to prevent multishare funds from having a disproportionate impact on the category average. The category average 30-day SEC Yield is the exception in this table and is calculated based on all funds in the category.

‡ 30-day SEC Yield is based on the most recent 30-day period and reflects the investment income earned after deducting a fund's expenses for the period.

The price/earnings ratio (P/E Ratio) is the ratio of a company's stock price to the company's per share earnings. The price/book ratio (P/B Ratio) is the ratio of a company's stock price to the company's book value. The price/sales ratio (P/S Ratio) is the ratio of a company's stock price to the company's revenue. The price/free cash flow ratio (P/FCF Ratio) is the ratio of a company's stock price to the company's per share free cash flow.

Forward-looking based on historical data. Source: Morningstar. Style and Market Cap Breakdown and Value and Growth Measures are calculated only using the long position holdings of the portfolio.

The valuation metrics table was compiled to provide a framework to analyze the characteristics of Cambria's Shareholder Yield ETF (BATS: SYLD) relative to its category. The valuation data—at the time this report was written—reflects the fundamental data of Price/Earnings ratios, Price/Book ratios, Price/Sales ratios, Price/Cash Flow ratios, and dividend yield so that investors can compare the ETFs across the same metrics.
